Goal: creating the necessary conditions for educational, scientific, sports and leisure activities, providing information, moral and psychological support to foreign students; development of cooperation between foreign students of university; presentation of the culture, history, traditions and customs of foreign students in the educational organization and beyond.

As part of the implementation of the policy, students develop a number of knowledge, abilities, skills, and competencies. Foreign students:

- learn about the features of modern Russia, its cultural heritage, the specifics of communication between representatives of different cultures, taking into account the verbal and non-verbal elements of formal and informal interpersonal communication;
- receive the knowledge and skills necessary for use in specific life situations related to interaction with residents of Russia;
 - activate the creative potential of the individual to maintain (form) an active life position;
- learn to build positive relationships with representatives of different cultures, better understand themselves and others, and respond flexibly to situations of uncertainty;
- acquire knowledge regarding the moral principles of the Russian mentality;
 - acquire skills in business and interpersonal communication in an intercultural environment and the joint creative activity

Expected results: increasing the educational level and developing scientific potential; increasing the legal literacy of foreign students; ensuring the continuity of the educational process, taking into account the age, individual and national characteristics of students; establishing conflict-free interaction between foreign students and university staff and students.
